Art Unit: 3693

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2,4,5,7,10,11 19-24 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for

A method of processing reports of malfunctions received by a **network service company** having a dispatch division and a billing division, the method comprising:

**receiving a notification from a customer of a repair service request for a requiring a network evaluation;**

receiving reports of malfunctions and dispatching a technician[[s]] in response to the reports;

receiving, via a communications network, information sent by the technician upon diagnosing a malfunction at a first subscriber location having a first line number, wherein the information is provided in an electronic format and -when analyzed indicates a cause of the malfunction underlying one of the reports of malfunctions sent from a vicinity of the first subscriber location and wherein the cause is at a location other than the first subscriber location, wherein the cost associated with the technician at the first location is recorded in association with the first line number, and wherein the identified cause indicates a range of line numbers that are affected including the first line number;

determining, by the dispatch division and based upon the information sent by the technician upon diagnosing the malfunction at the first subscriber location, that a cause underlying another one of the reports of malfunctions, received from a location different from the vicinity of the first subscriber location

Art Unit: 3693

and having a second line number, is the same cause identified as underlying the report of malfunction at the first subscriber location due to the second line number being within the range of line numbers that are affected;

identifying, by the company, an entity other than a first subscriber of the first subscriber location that is responsible for the cause; and utilizing the information, by the billing division, to generate a bill to the entity other than the first subscriber that includes costs incurred at least for diagnosing the malfunction at the first subscriber location by looking up the range of line numbers associated with the cause for which the entity is responsible, finding that the first line number falls within the range, looking up the costs incurred for the first line number, and including the costs incurred for the first line number on the bill to the entity.

It does not provide does not reasonably provide enablement for non network requests such as insurance inspections and the like. Moreover, it does not enablement for receiving reports of malfunctions with out first receiving a notification from a customer. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

The applicant argues that the independent claim 20 does not recite "non-network requests such as insurance inspections". Similarly, independent claim 20 does not recite the recitation of "receiving reports of malfunctions without first receiving a notification from a customer." And the applicants assert that it is improper to require that the specification must enable subject matter that is not part of the claimed invention.

The argument is not persuasive as the claims "read on" the above and thus the claims are broader in scope than the accompanying specification.

Art Unit: 3693

Claims 2,4,5,7,10,11 19-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
